Office Action Summary

Application No.
09/177,700

Applicant(s)
Gardell et al.

Examiner
Hanh Nguyen

Art Unit
2662

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☐ Responsive to communication(s) filed on _____

2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 35 C.D. 11; 453 O.G. 213.

Disposition of Claims

4) ☒ Claim(s) 1-19 is/are pending in the application

4a) Of the above, claim(s) _____ is/are withdrawn from consideration

5) ☐ Claim(s) _____ is/are allowed.

6) ☒ Claim(s) 1-19 is/are rejected.

7) ☐ Claim(s) _____ is/are objected to.

8) ☐ Claims _____ are subject to restriction and/or election requirements

Application Papers

9) ☐ The specification is objected to by the Examiner.

10) ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.

11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved.

12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

a) ☐ All b) ☐ Some* c) ☐ None of:

1. ☐ Certified copies of the priority documents have been received.

2. ☐ Certified copies of the priority documents have been received in Application No. _____

3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

*See the attached detailed Office action for a list of the certified copies not received.

14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

15) ☒ Notice of References Cited (PTO-892)

18) ☐ Interview Summary (PTO-413) Paper No(s). _____

16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)

19) ☐ Notice of Informal Patent Application (PTO-152)

17) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____

20) ☐ Other: _____

Art Unit: 2662

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 USC 103(a) as being unpatentable over **Kumar et al.** (US Pat. No. 6,006,253) in view of **Skarbo et al.** (US Pat. No. 5,546,447).

- Regarding claims 1, 2, 6, 7, 8, 10, 15 and 16 **Kumar et al.** discloses, in Fig. 1, a Gateway 122 that communicates between PSTN 170 and computer H.323 terminals. The gateway 122 provides appropriate conversions between different network types (a Gateway is in communication with a switch circuit network and translates PSTN signals into computer network signals). See col.3, lines 5-37. A Multipoint Control Unit 126 (MCU) comprises a Manager Control (MC) that is connected with the gateway 122 and H.324 terminals (Signal routing agent is in communication with gateway and terminals). See col.3, lines 30-50. **Kumar et al.** does not disclose the signal routing agent that is programmed to simultaneously transmit plural line appearance signals that identify origins of incoming calls to the selected terminal. **Skarbo et al.** discloses a system that includes a telephone interface (gateway) that receives incoming calls from

Art Unit: 2662

callers; a logic for searching and displaying a caller name and caller telephone number (Data base); and a logic for automatically displaying the caller information on user terminal as shown in Fig.4. Fig.4 indicates a screen format that contains caller identification information retrieved from the caller database. For each caller 410, the identification information contains caller telephone number, caller name, title, address, etc.. (incoming calls are transmitted to the selected terminal). See col.3, line 65 to col.4, line 10 & Abstract. Therefore, it would have been obvious to use the caller ID displaying format of **Skarbo et al.** in **Kumar et al.** in order to transmit incoming calls to select terminal.

- Regarding claim 3, **Kumar et al.** discloses, in Fig.2B, H.323 terminals within panel 210 communicate with the MCU 220 in a point-to-point manner on the H.245 control channel 222 and audio, video channel 228 (signal routing agent is in communication with respective terminals). See col.4, lines 30-45.

- Regarding claim 4, **Kumar et al.** discloses substantially the limitations of this claim in claim 1 above, except a configuration database storing terminal information. **Skarbo et al.** discloses, in Fig.2, a processor 101 that retrieves data from data storage device 113 and download s this data into memory 102 for execution (database storing terminal information). See col.3, lines 13-16. Therefore, it would have been obvious to use the database 113 of **Skarbo et al.** 's system into the network 110 as disclosed by **Kumar et al.** to store identification information such as phone numbers.

Art Unit: 2662

- Regarding claim 9, this claim is directed to the same subject matter claim 1, except for at least one gate keeper in communication with the gateway, and controls the gateway to transmit signals to the signal routing agent. **Kumar et al.** discloses, in Fig. 1, a Gatekeeper 124 that provides control access over network 110 in such a way the gatekeeper 124 is connected with the gateway 122 and MCU 126 (at least one gate keeper in communication with the gateway, and controls the gateway to transmit signals to the signal routing agent). See col.3, lines 40-50.

- Regarding claim 11, **Kumar et al.** does not disclose a second Gatekeeper that connects to the first Gatekeeper. However, it is well known in the art to add a second Gatekeeper that connects to the first Gatekeeper, signal routing agent. Therefore, it would have been obvious in the art at the time the invention was made to add a second Gatekeeper into network 110 as disclosed by **Kumar et al.** to locate a gatekeeper that services a particular dialed number.

- Regarding claims 12 and 14, the limitations of these claims have been addressed in claim 7.

- Regarding claim 13, the limitation of this claim has been addressed in claim 6.

Claims 5 and 17- 19 are rejected under 35 USC 103(a) as being unpatentable over **Kumar et al.** (US Pat. No. 6,006,253) in view of **Skarbo et al.** (US Pat. No. 5,546,447), and further in view of **Pepper et al.** (US Pat. No. 5,930,700).

- Regarding claim 5, **Kumar et al.** does not disclose the database comprises an association table. **Pepper et al.** discloses, in Fig.8, a phone book screen 800 which provides a

Art Unit: 2662

database for maintaining a list of names 806, phone numbers 808, and addresses 810. All of these are arranged in a table. See col.9, lines 10-20. Therefore, it would have been obvious to use the table database of **Pepper et al.** 's into the network 110 of **Kumar et al.** to determine the terminal corresponding to the dialed number.

- Regarding claims 17- 19, these claims are directed to the same subject matter claim 1, except for the following: **Kumar et al.** does not disclose a database that determines terminals corresponding to the dialed number. **Pepper et al.** discloses, in Fig.3, a database 308 that communicates with the PDA 200. The database 308 may contain a copy of the subscriber 's Phone book and Date book databases. Preferably, the database 308 automatically synchronizes with the information stored in the subscriber 's PDA 200 (a database that determines terminals corresponding to the dialed number). See col.5, lines 30-45. Therefore, it would have been obvious in the art at the time the invention was made to use the database 308 of **Pepper et al.** 's system into the network 110 as disclosed by **Kumar et al.** to determine terminals corresponding to dialed number.

Response to Arguments

2. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2662

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Mayak (US Pat. No. 6,192,116B1) discloses a System and Method for Generating CID/CIDCW Information With a User Inputted Message.

- Stewart et al. (US Pat. No. 6,018,360) discloses Method of Switching a Call to a Multipoint Conference Call in a H.323 Communication Complaint Environment.

- Guy et al.(US Pat. No. 6,226,367B1) discloses Calling Line Identification with Location Icon.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh Nguyen whose telephone number is (703) 306-5445. The examiner can normally be reached on Monday-Friday from 8:00AM to 5:00 PM.

If attempts to reach the examiner by telephone is unsuccessful, the examiner's supervisor, Hassan Kizou, can be reached on (703) 305-4744. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4700.

Any response to this action should be mailed to :

Commissioner of Patents and Trademarks
